Pepsin for Human collagen Type I ELISA kit

EC1—E110

ACEL **ECM reagent series**

Pepsin for Human collagen Type I ELISA kit

When collagen production cell (fibroblast) is cultured in petri-dish, collagen in culture media deposit as ECM. The deposited collagen or tissue collagen can be eluted by pepsin digestion. Prepare pepsin solution (Dissolve pepsin powder into 50 mM acetic acid solution to final concentration 0.1 mg/mL)

Material: From Porcine Stomach Mucosa
Quantity: 500mg
Shape: Powder
Store: 4°C

For Research Use Only
