

# MBLI's Easy-To-Use Western Reagents

## Western Substrates

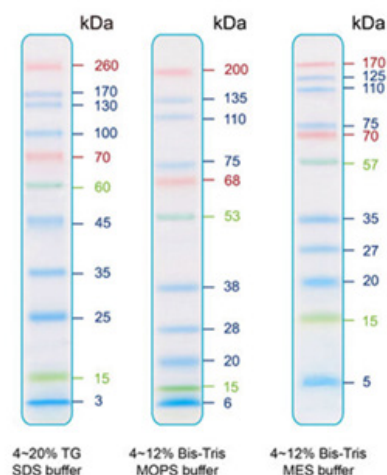

- High Sensitivity
- Compatible chemiluminescent substrate
- Compatible with PVDF and nitrocellulose membranes
- No optimization required

Product Code	Product Name
BC321-100	Pico Plus Western Substrate
BC345-100	Pico Ultra Western Substrate
BC375-100	Femto Plus Western Substrate
BS001-500	OneStep Blocker – Western Blocking Solution and Signal Enhancer

## Protein Ladders

- Wide range of molecular weights
- Reliable reference markers

Product Code	Product Name
BP12-500	Unstained Protein Ladder, (12 unstained bands, 10-200 kDa)
BP09-500	Plus Prestained Protein Ladder (9 pre-stained bands, 15-170 kDa)
BP01-500	Ultra Prestained Protein Ladder (10 pre-stained bands, 6.5-270 kDa)
BP11-500	Prestained Protein Ladder (11 pre-stained bands, 3-260 kDa)
